DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 4-7 and 10-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach multiple thin plates of an inner yoke being the same shape and same dimension with each of the thin plates having strong magnetic permeability in parallel to one of the X or Y axis as recited in claims 1 and 10. The prior art of record does not disclose or teach a linear motor wherein the radius of curvature of the inner periphery of the outer yoke is equal to the radius of curvature of the inner periphery of the slot, and the radius of curvature of the outer periphery of the outer yoke is equal to the radius of curvature of the outer periphery of the outer yoke and the radius of curvature of the outer periphery of the outer yoke is greater than the radius of curvature of the inner periphery of the outer yoke or the slot combined with the other features of claim 11. The prior art of record does not disclose or teach a linear motor having two inner yokes are integrated with two inner yoke support members positioned separately in the direction of the Y axis in combination with the other features of claim 13.

While original claim 3 was rejected over Takahashi et al. and figure 3 of Redlich, Takahashi et al. shows an outer coil acting on inner magnets. Redlich discloses inner coils acting on outer magnets in figure 3. In figure 9 Redlich discloses outer coils acting on inner magnets. If one were to look to the teachings of Takahashi et al. to improve the motor of Redlich, the most likely combination would be Redlich figure 9 and Takahashi et al. instead of Redlich figure 3. No motivation has been found for combining an E shaped yoke as taught by Takahashi et al. in figure 11a for use with an outer coil/inner magnet embodiment with the inner coil/outer magnet

embodiment as shown in figure 3 of Redlich. Therefore the previous rejection of the subject matter of claim 3, which is now included in independent claims 1 and 10, is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
